

Focus Statement A New Song: When we have been through disorientation, we cannot pretend that life always is as it should be. Nevertheless, as we experience God's transforming grace, we move into the new orientation knowing that death and despair do not have the last word.

Psalms Triptych Artist Statement

In times of reorder, I can see the first signs of new life emerging. Things have been lost or damaged, and last season's fruit will not return. But God draws out new blossoms – a promise of new fruit yet to come.
